

Dermatology

Compounded medications to support and care for our largest organ.

The expert team at Table Rock Pharmacy can prepare compounded preparations for a variety of skin care needs and offer customized medications and delivery methods such as creams and gels.

Available dermatological compounding solutions

Dermatological compounds can be helpful both therapeutically and esthetically for a variety of skin conditions, including the following:

Acne	Warts or plantar warts	Scarring
Diaper rash	Pruritus	Keloids
Nail infections or removal	Psoriasis	Photoaged skin/wrinkles
Pigmentation abnormalities	Rosacea	Pain

We also offer options that are non-comedogenic, hypoallergenic, oil-free, paraben-free and petrolatum-free. In addition, compatible drugs can be combined into a single dosage form to simplify the administration of medication, which in turn helps encourage compliance.
